SUMMARY

Cloud and backend engineer who ships real systems end to end: 2+ years building, and now operating, a live AWS platform solo (Terraform, Docker, test-gated CI/CD over OIDC, 62% cost reduction) and a contract app later adopted by the U.S. military. Cum laude CS grad seeking a cloud, backend, or DevOps engineering role.

PROJECTS

Balisong Flipping Center · Creator & Sole Developer

Mar 2024 – Present · [Live App](#) · [GitHub](#)

- Cut AWS spend 62% (\$105 to \$40 a month) by auditing Cost Explorer data and shutting down unused environments.
- Manage 76 AWS resources as Terraform code, so production can be rebuilt from scratch with no hand-configured servers.
- Shipped 41 production deploys in 10 weeks (95% success), each tested and rolled out by GitHub Actions in ~2.5 minutes.
- Designed a Spring Boot API with 106 REST endpoints and 26 schema migrations, covered by 494 tests that gate every deploy.

Latch: Claude AI Assistant · Creator

Aug 2026 – Present · [GitHub](#)

- Wrote a 29-scenario eval suite and used its failures to fix prompts and tool definitions, raising the pass rate from 62% to 92%.
- Cut the wait for a first response from about 8 seconds to 1.2 by streaming text through the Python service and Spring relay.
- Lowered model cost per eval run 59% with prompt caching, and blocked deploys on a 63-test suite.

QuizMaster (Senior Capstone) · Team Lead

Jan 2024 – May 2024 · [Live App](#)

- Led a 4-person scrum team that shipped a React/Firebase quiz app on schedule, owning 23+ of its user stories.
- About 40 test users created roughly 20 quizzes on it, and the app was demoed and then used in summer classes.
- Set up CI/CD and fixed 13 database bugs through unit and integration testing.

EXPERIENCE

Contract Lead Android Developer · Galileo Innovations

Chicago, IL · Jan 2020 – Aug 2020

- As primary Android engineer on a 4-person team, built login and real-time graphs of medical data streamed over Bluetooth.
- Fixed Bluetooth and WebSocket sync bugs that had blocked the team for a month, roughly doubling our pace toward delivery.
- Delivered a working prototype in 6 months that ran on 30 devices in alpha testing and was later adopted by the U.S. military.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL

Cloud & DevOps: AWS (EC2, S3, CloudFront, ECR, Route 53, SSM, Bedrock), Terraform, Docker, GitHub Actions, Linux

Frameworks: Spring Boot, Spring Security, FastAPI, React, Redux, REST APIs, WebSocket/STOMP, JWT/OAuth2

Data: PostgreSQL, Flyway, Redis, MySQL

Testing & AI: JUnit, Mockito, Testcontainers, pytest, LLM tool calling, prompt caching, LLM evaluation

Certification: AWS Certified Cloud Practitioner (in progress)

EDUCATION

B.S. in Computer Science · Lewis University · Romeoville, IL · Graduated 2024

[Graduated Cum Laude](#) · [GPA: 3.5](#)

Coursework: Data Structures & Algorithms, OOP, Relational Databases, Operating Systems, Software Engineering, Networks

A.S. in Software Development · College of DuPage · Glen Ellyn, IL · Graduated 2022
