SUMMARY

Backend-focused software engineer with 10,000+ commits across two production systems — including software adopted by the U.S. military. Builds end to end: containerized Java/Spring Boot microservices, automated CI/CD pipelines on AWS, and React frontends. Cum laude CS grad (Lewis University, 2024) who ramps into unfamiliar codebases fast and takes full ownership from implementation to deployment.

EXPERIENCE

Founding Engineer · [Balisong Flipping Center](#)

Remote · Jan 2021 – Present · [GitHub](#)

- Architected and shipped a production-grade full-stack platform from scratch — 9,000+ commits, 40+ features, live on AWS.
- Containerized Java/Spring Boot microservices deployed to AWS EC2; ECR-managed images enable consistent, repeatable rollouts.
- Engineered JWT + OAuth2 authentication flows, securing user identity and access across the full platform.
- Automated the entire deployment pipeline with GitHub Actions, Ansible, and Docker — every release ships with a single git push.

Stack: *TypeScript, React, Redux, Spring Boot, MongoDB, Docker, AWS EC2, AWS ECR, GitHub Actions, Ansible, JWT, OAuth2*

Software Engineering Team Lead · [Lewis University — Senior Capstone](#)

Romeoville, IL · Jan 2024 – May 2024 · [Live App](#)

- Led a cross-functional scrum team end to end — drove sprint delegation, ceremonies, and deployment with zero schedule slippage.
- Led and delivered 23+ user stories across a React/Firebase quiz application, shipped on time.
- Automated CI/CD build and deployment pipelines, eliminating all manual release steps.
- Diagnosed and eliminated 13 database bugs through systematic unit/integration testing and root cause analysis.

Stack: *React, Firebase, AWS, CI/CD, Agile/Scrum, NoSQL, Git*

Contract Lead Android Developer · [Galileo Innovations](#)

Chicago, IL · Jan 2020 – Aug 2020

- Led Android development end to end as the primary engineer across a 4-developer, 3-team cross-functional environment.
- Resolved critical WebSocket/Bluetooth data sync bugs that were blocking the team — restored ~2x development velocity.
- Delivered a production-ready prototype in 6 months — application selected and deployed by the U.S. military.

Stack: *Java, Android SDK, WebSockets, AWS Lambda, Git*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java · Python, C++

Frameworks & Libraries: React, Redux, Spring Boot · Android SDK

Cloud & DevOps: Docker, Containerization, AWS EC2, AWS ECR, GitHub Actions, CI/CD · Amazon S3, Ansible

Data & APIs: MongoDB, MySQL, SQL, NoSQL, REST APIs, JWT, OAuth2 · Firebase, WebSockets

Tools & Practices: Git, Linux, OOP, MVC, Agile/Scrum, Software Development Life Cycle (SDLC) · Jira, Postman, Swagger

CERTIFICATIONS

AWS Certified Cloud Practitioner · Amazon Web Services · [Exam Scheduled — August 2026](#)

EDUCATION

B.S. in Computer Science · Lewis University · Romeoville, IL · Graduated 2024

Graduated Cum Laude · GPA: 3.5

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Relational Databases, Operating Systems, Software Engineering, Computer Networks

A.S. in Software Development · College of DuPage · Glen Ellyn, IL · Graduated 2022
